

# Mucomyst Post Exam Medication Planner

Radiology

Name: \_\_\_\_\_ Appointment date: \_\_\_\_\_

The IV contrast (X-ray dye) injected for Radiologic exams could potentially have harmful effects on your kidneys. Your Physician has recommended that you take Mucomyst (Acetylcysteine oral solution) after your IV contrast study to protect your kidneys.

After your IV Contrast Exam	1 Day after your IV Contrast Exam
<p><input checked="" type="checkbox"/> Drink at least 1 liter (4 cups) of water during the course of the day.</p>  <p><input checked="" type="checkbox"/> In the evening after your exam, take your first dose of Mucomyst, mixing with beverage of choice.</p> <p><b>IMPORTANT:</b> Mix Mucomyst with at least 4oz of Orange Juice, Diet Cola or other strong tasting beverage. Be sure to drink all of the contents within 1 hour of mixing.</p>	<p><input checked="" type="checkbox"/> Take your second (last) dose of Mucomyst after you wake up in the morning. Mixing with beverage of choice as before</p> <p><input checked="" type="checkbox"/> Drink at least 1 liter (4 cups) of water during the course of the day.</p>
