

Name: _____

Appointment Date: _____

Check In Time: _____

Location: _____

CT Scan (Computed Tomography Scanning) uses a thin X-ray beam to produce images of the body that are thin slices. These slices provide high resolution images of both bone and soft tissues. Depending on the type of scan your physician has requested, you may be given a thin barium solution to drink and/or an injection of IV contrast or X-ray dye as part of your exam.

If you have any questions regarding your exam, please feel free to call us at any of the following locations.

Bellevue 206-341-1030
